

## **Green Seal – Directions for use.**

A two coat application, wet on wet, will give sufficient protection provided application guidelines are met.

Power wash surfaces to be treated, Remove stains caused by oil, grease and soils.

Surface may be damp, but excess water must be removed from the surface prior to application.

Apply using brush, roller or low pressure spray. Do not apply excessively or allow the sealer to pool on the surface.

Always test a small area prior to commencement to ascertain the effect of the sealer on the surface.

Do not use above 30°C or below 10°C or if rain is imminent.

Use material directly from container. Do not dilute.

The sealed surface will be suitable for foot traffic after 24 hours.

Do not wash down for 48 hours following application.

Coverage will depend on surface porosity. 2m<sup>2</sup>/litre on very porous surfaces and 5–15m<sup>2</sup>/litre on dense surfaces as a guide.

Shelf life – 12 months in unopened containers.

Read all warnings.
