

Usage Instructions for Husqvarna Enzyme Concrete Cleaner

Scrubber Instructions:

1. When changing over to Husqvarna Enzyme Concrete Cleaner, rinse scrubber machine well to ensure any residual product (used previously in scrubber machine) is removed. This will prevent the possibility of streaking.
2. Dilute product at a ratio of 100:1.
3. **For smooth floor surfaces:** Use a general scrubbing pad as per normal

For uneven/textured floor surfaces: Use a soft pad so that the pad and the Enzyme Concrete Floor Cleaner is in contact with the total surface area of the floor.

Note: The Enzyme Concrete Cleaner that is left below the floor line and gets into the grooves will continue to work for up to 48 hours. It is preferable to leave a thick layer of product on the floor for maximum efficiency. Product is designed to dry quickly.
