

**Shizuoka**

Electric Infrared Heater

Model WPS-20**Made in Japan**

The ideal electric heater for instant heating in workshops, showrooms, meeting rooms, entrances etc.

The panel can efficiently heat wide areas from side-to-side and is easy to move and position, with a 20 degree variable angle adjustment. Fitted with safety devices.

Sunlight Warmth

The WPS-20's far-infrared penetrates evenly on and into surfaces just like sunlight.

Wide Heating

Due to the large radiation panel the WPS-20 can effectively heat up wider areas.

Safe Surface Temperature

Reduced risk of fire by the lower surface temperature of its panel. (normal electric heater is 750C, the WPS is only 300C).

No Air Movement

The WPS-20 generates straight-forward infrared heat with no air flow, allowing for a comfortable and dust-free environment.

Safety Devices

Tip-over detection, overheating protection, auto-restart prevention and a fuse.

Specifications:

Model	WPS-20
Heat Output	2kW
Power source	230v, single phase
Dimensions (mm)	1,110H x 650W x 550D
