

Husqvarna DE 110 S

This versatile HEPA dust extractor is compact and easy to transport, yet powerful. Its three-stage filtration process including large filter surfaces enables long run-time between filter cleanings. Its high water protection allows fast and efficient decontamination.

Easy to transport

Thanks to its compact size and light weight, the dust extractor is easy to transport. Smart details, such as lifting hooks, the possibility to attach hoses, wand and floor tool to the machine and the ability to drive it on its two wheels allow for smooth manoeuvring.

Safety focus

The dust extractor complies with the latest H-class standards for dust extractors for heavy-duty usage. It contains a HEPA filter (with EN1822 certification) which is separated from the pre-filter. An integrated filter alarm indicates when it is time to clean the filter. Cleaning can be done by simply pressing a button.

Continuous high performance

The three-stage filtration system allows operators to work long intervals without interruption.

Easy to clean

The high water protection standard allows for easy cleaning and decontamination of the machine.

FEATURES

- Continuous high performance
- Safety focus
- Easy to transport
- Easy to clean
- Improved Longopac® attachment system
- Optimised accessory range

Technical Specifications

MOTOR	
Phases	1
Voltage	230 V
Rated current	4 A
Frequency	50–60 Hz
Max. vacuum	200 mbar
Rated input power	0.9 kW
PRODUCT SIZE	
Product size height	1000 mm
Product size length	670 mm
Product size width	400 mm
Weight	25 kg
SPECIFICATIONS	
Air Flow	200 m³/h
Max. vacuum	200 mbar
PACKAGING	
Packaging length	1190 mm
Packaging width	745 mm
Packaging height	470 mm
Packaging volume	416.68 dm³
