

# SELF-PROPELLED SCISSORS

## CUSTOMERS FIRST. ALWAYS.

### **PARTNERING FOR SUCCESS**

Our dedication to lifting you higher extends well beyond the physical reach of our products. We thrive on building satisfying customer relationships founded on the idea of partnership. Because you, our customer, are at the centre of everything we do.

Since 1966, we've been developing products to solve your worksite challenges – and that process

never ends. Our team of product managers and engineers uses your input to design new products, featuring the latest technology to meet your changing needs. Then we manufacture those products to stringent standards that help increase quality, lower costs and give you exceptional value for years to come.

Our commitment doesn't end with the sale. Our dedicated service

teams are available to provide support when you need it most. Our extensive parts network ships most parts within 24 hours, too. Simply put, we're always working to help maximise your "up time" so you can be more successful.

Genie is driven by one goal: doing the right thing, at the right time for our customers. That's not just what we do; it's who we are. So tell us what you need. We're listening.

### **SETTING THE STANDARD**

Genie manufactures some of the most advanced, highest-valued lift equipment in the industry. Genie distinctive blue lifts set the standard for performance and durability – not to mention support from people who understand your business.

# ELEVATED EFFICIENCY WITH INDUSTRY-LEADING DESIGN

The ever-expanding line of Genie® electric and rough terrain scissor lifts offers you unmatched performance and versatility – boosting work site productivity. Genie® electric scissor lifts are exceptionally mobile, letting you manoeuvre in tight worksites. Plus, they're productive and efficient, allowing maximum workspace for larger loads and more workers. Genie® rough terrain scissor lifts also enhance productivity by providing exceptional traction, speed and gradeability. They're the perfect machines for big outdoor jobs where platform workspace is critical.

Genie® scissor lifts provide productivity-enhancing speed and gradeability to help you make the most of the equipment on your jobsite.

# PRODUCTIVITY

Genie® self-propelled electric scissor lifts are the industry solution for increasing worksite productivity. Ideal for manoeuvring in tight spaces, they're excellent for indoor and outdoor construction, maintenance and installation applications with firm, level surfaces. Characterised by low noise levels, these lifts provide excellent capacity and maximum platform workspace.

### **EASY SERVICE**

On-board diagnostics help operators troubleshoot on the fly and make adjustments in the field to maximise uptime. Swing-out battery box and power module trays allow easy access to engine components for convenient service.

### SIMPLE ACCESS

These compact units easily pass through standard single or double doors. Solid non-marking tyres are standard.

The Genie® slab scissors family has been completely updated with features that enhance reliability, serviceability and performance.

### **CONVENIENT OPERATION**

Low-emission electric scissors deliver a quiet, convenient method for operation in sound-sensitive environments like office buildings, shopping malls, hotels, schools and more. Gain access to even loftier jobs with the GS™-3232, which provides working heights up to 11.75 m (38 ft) while fitting into spaces as narrow as 0.81 m (32 in) wide.

### **OUTDOOR FUNCTIONALITY**

Electric self-propelled scissors offer outdoor functionality on firm, level surfaces, providing accessibility for a wide variety of applications.

### **COMPACT MANOEUVREABILITY**

All models have front-wheel drive and most models feature zero inside turning radius for excellent manoeuvreability in tight spaces like congested construction sites, elevators and narrow aisles.

### **FOLDING GUARDRAILS**

Neatly folding guardrails make it easy to manoeuvre through doorways, into elevators and throughout other height-restricted areas.

### **DUAL FLASHING BEACONS**

Orange flashing lights warn workers when lift is moving or in operation.

### **NON-MARKING TYRES**

These hard rubber non-marking tyres prevent scuffing floors or picking up debris that could otherwise damage a floor.

# EXTENSION OF THE PROPERTY OF T

### SELF-LEVELING OUTRIGGERS

The Genie® GS™-3232 slab scissors model helps maximise uptime with a compact, manoeuvreable design and automatic hydraulic, non-marking, self-leveling outriggers that level the lift on uneven ground – up to 5° side to side – before elevating the platform.

# AND POWER

Genie® rough terrain scissor lifts are tough, construction-oriented four-wheel drive machines with positive traction control – ideal for increasing productivity in demanding outdoor worksites. Competitive lift speed and large platforms maximise efficiency with the handling and capacity to get to the jobsite and finish working faster.

### **SPEED AND TRACTION**

Genie® RT scissor lifts are able to traverse through uneven or rough terrain environments more efficiently. They are equipped with four-wheel drive and positive traction control for traction when you need it most. They offer up to 50% gradeability when driving on slopes.

Heavy duty fold-down guardrails and a removable rear platform railing allow increased accessibility for loading and unloading the machine in trucks, containers and other situations with limited overhead space. These features also allow easy access through doorways.

Genie® RT models are built for the rental industry and built to last. They're designed to stand up to the rigours of frequent use in diverse worksite conditions.

### **MORE ROOM TO WORK**

These units are ideal for jobs that require greater capacity for more workers, materials and tools. For added workspace, all RT models come standard with a multi-position slide-out extension deck on the front of the platform. A rear slide-out extension deck is standard on models GS™-3384 RT and up. In addition, optional power to the platform allows workers to use electrically powered tools.

### **EASY SERVICE**

On-board diagnostics help operators troubleshoot on the fly and make adjustments in the field to maximise uptime. Plus, slide- or pull-out engine trays allow easy access to components - no need to reach around obstacles inside the machine. Many parts and service procedures are common across the entire Genie® scissors line for cost-effective parts stocking and maintenance efficiencies.

### **OSCILLATING AXLE**

Genie's oscillating axle automatically senses the terrain and adjusts the axle position based on ground conditions for maximum stability.

### SELF-LEVELING HYDRAULIC OUTRIGGERS

Save time with Genie's automatic leveling hydraulic outriggers. All four outriggers automatically deploy simultaneously to ensure the lift is level on uneven ground before elevating the platform.
